Entrpnr Collaborated With Eastern Enterprise To Transform Their Accounting Dashboard

ABOUT ENTRPNR

Eastern Enterprise worked with Entrpnr to create API connectors for their accounting Dashboard. Entrpnr is a Dutch accounting firm that offers specific solutions for entrepreneurs such as factoring, legal, insurance and marketing services.

Entrpnr is basically a full-service administration office. The core of their service is taking care of you and your financial administration. Entrpnr is proactive and picks up where other accountants stop. As a result, they have become an organization that offers entrepreneurs and companies true total support in managing their business.

PROJECT CHALLENGE

Entrpnr initially employed traditional methods that were available in the market to connect multiple services to their Yuki dashboard.

They were looking for an effective and intuitive method that would integrate multiple services and pass data from these services to Yuki's dashboard. This would allow users to visually view data on Yuki, Entrpnr's administrative system.

OUR SOLUTION

Approach

Eastern Enterprises understood the data mapping that would be required to develop a scalable system that would meet the client's ask.

We proposed that we develop API connectors that would connect multiple services. The Entrpnr API connector would be a central connector on which a multitude of external API links can be made with a specific yuki administration customer domain. Various API actions could be centrally controlled in a dashboard.

TECHNOLOGY STACK

PHP v7.4

PHP Laravel
Framework v9

Bootstrap

jQuery

Javascript

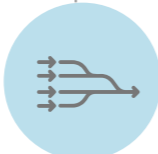

KEY BENEFITS

A solution that is scalable

Ensures ease of use for users with seamless integration

Reduces technical complexity

END RESULT

An API solution that seamlessly integrates multiple services to Entrpnr's Yuki dashboard ensures scalability as the services needed to be integrated may grow in number.

TESTIMONIAL

Rogere Lankreijer,
CTO, Entrpnr Finance B.V

In our search for a reliable solid development partner. We are very fortunate that we have come into contact with Eastern Enterprise. After an extensive introductory meeting where we were able to explain our case in detail and our wishes for the technology to be used, we quickly arrived at a clear software development plan. Communication is essential in software development. We are very satisfied with this. Contact is clear and solutions are well thought out to make our case a success.
